Company Location/Address: 1129 West Governor Road, Hummelstown, PA 17036

Position(s) /Job Title(s): Field Technician - Geophysics

Job Description: Field Technician – Geophysics - Candidate must have a Vocational Technical (Vo-Tech) School or High School Diploma with 0 to 3 years of experience. Forty-hour OSHA training is beneficial, but not required. Position will support a wide range of projects related to environmental cleanup, water resources, geotechnical, and oil & gas related projects. Typical tasks to be completed by the successful candidate include the following: collect surface geophysical data using EM31, EM61, magnetometer, seismic, electrical resistivity imaging, ground penetrating radar (GPR), radio detection utility locating tools, and gravity; download data loggers and equipment and verify field data; operate differential global positioning system equipment; operate borehole geophysical equipment. Ideal candidate will have familiarity with downhole tools including: temperature, caliper, resistance, SP, resistivity, heat pulse flow meter, optical and acoustic televiwers, and borehole video. Successful candidate will also perform soil and groundwater sampling and other environmental field work; prepare field sketch maps showing survey locations; maintain log book and data sheets indicating data collected acquisition parameters, and field observations; review and apply appropriate geophysical standards in implementing a designed geophysical survey; and interface with office and other field staff during and following completion of geophysical surveys. Successful candidate must have the ability to lift 75 pounds on a regular basis, have knowledge of OSHA safety requirements, and have the availability and willingness to travel to various locations in the U.S.
