Position(s) /Job Title(s): Entry-Level Machine Shop Fabricator/Finisher

Job Description: This is an entry-level position in our Machine Shop where you will be trained and you can grow your career. The Fabricator/Finisher fabricates components using hand tools and computer controlled fabrication equipment. The position will also finish machined and fabricated components by removing sharp edges, burrs and prepares the surface for further finishing, which includes applying the final finishes to components per the blueprint and procedures using chemical conversion, electro-chemical or paint systems.

Type of Position: Full-time, Permanent

Position Available on: 08/27/2018
